HOW TO PLAY: HEX MAZE

Navigate a hexagonal grid from start to finish.

RULES

1. Find a path from the start hex to the finish hex.
2. Move between adjacent hexagons — each hex has up to 6 neighbours.
3. Walls between hexes block passage.
4. There is exactly one solution path.

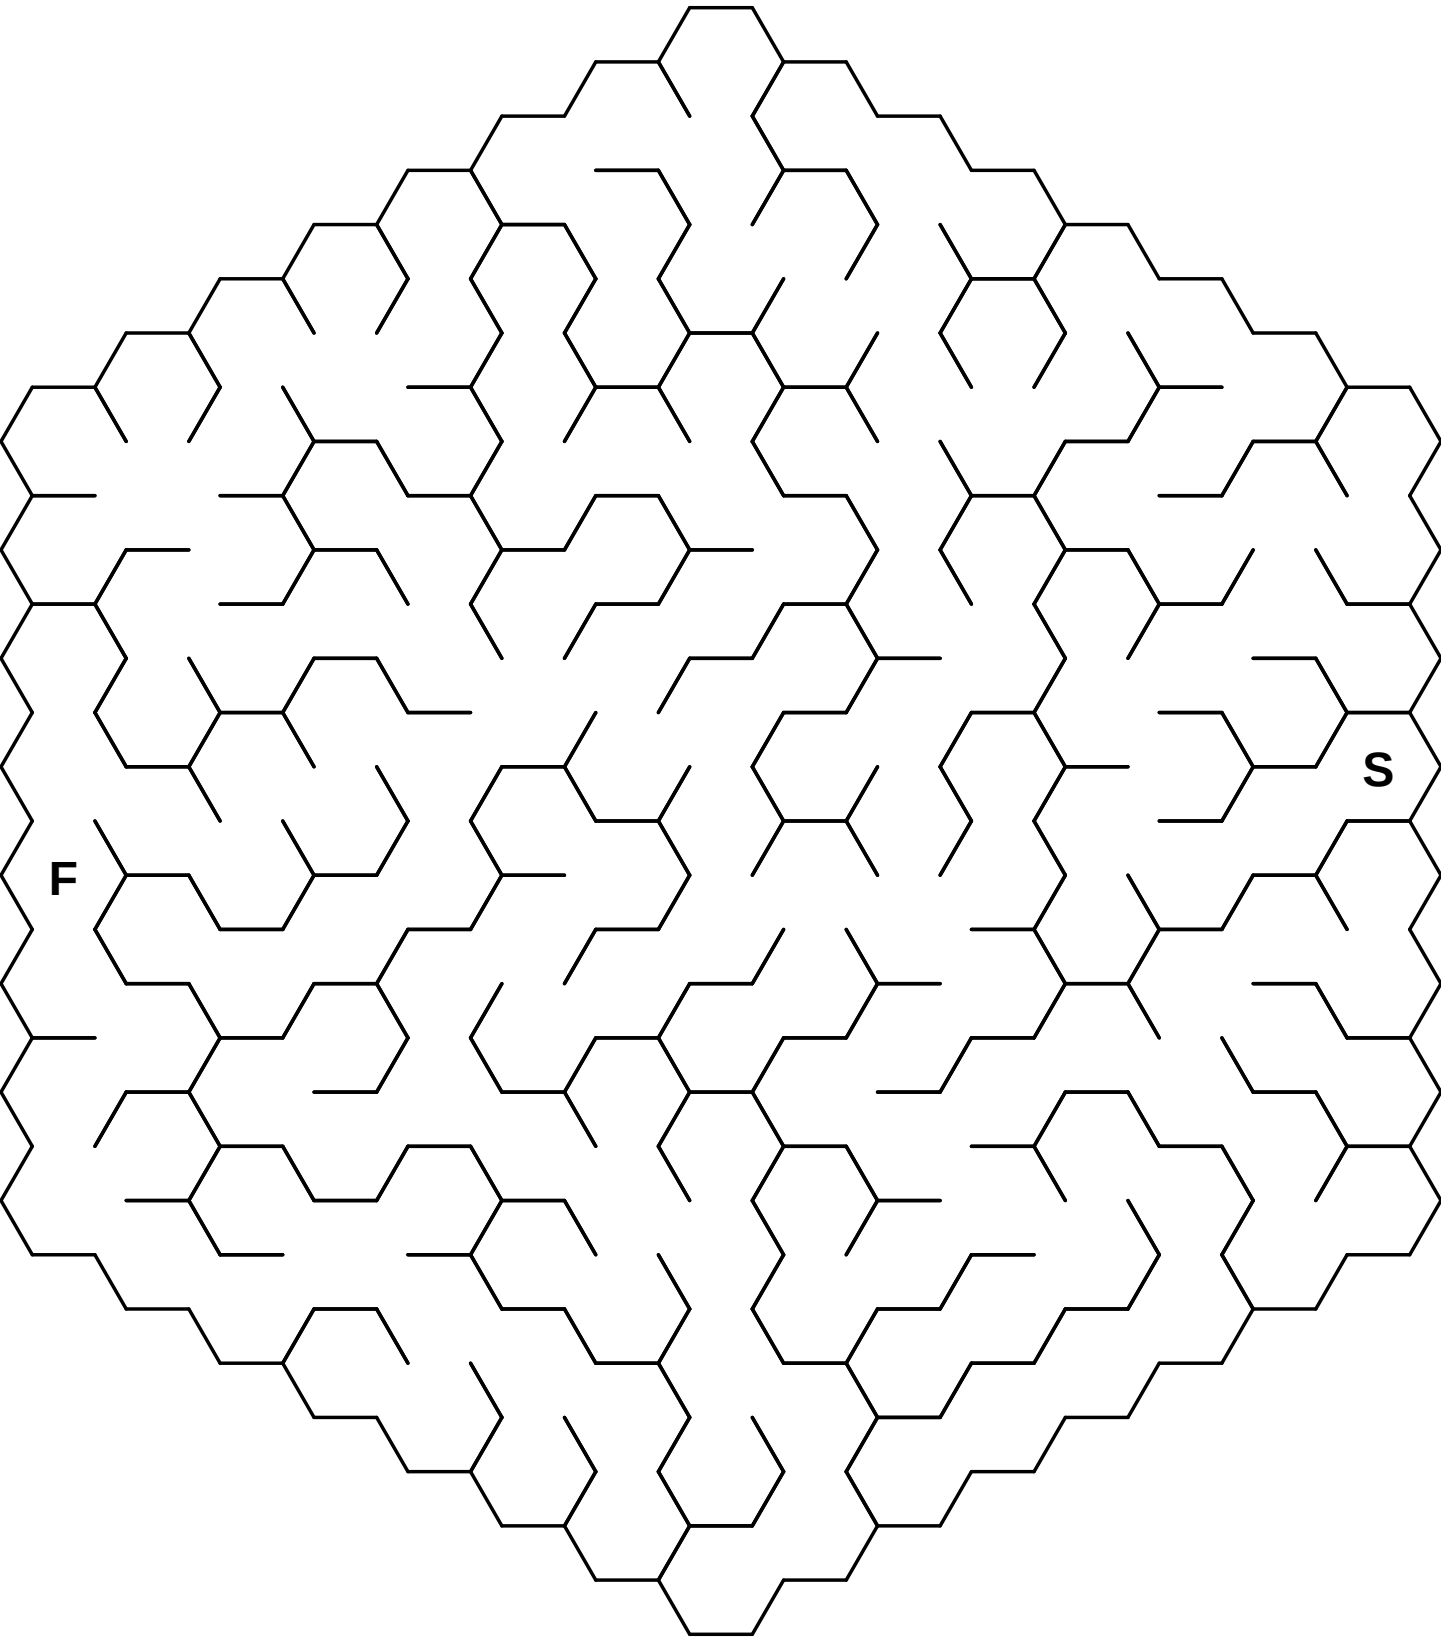

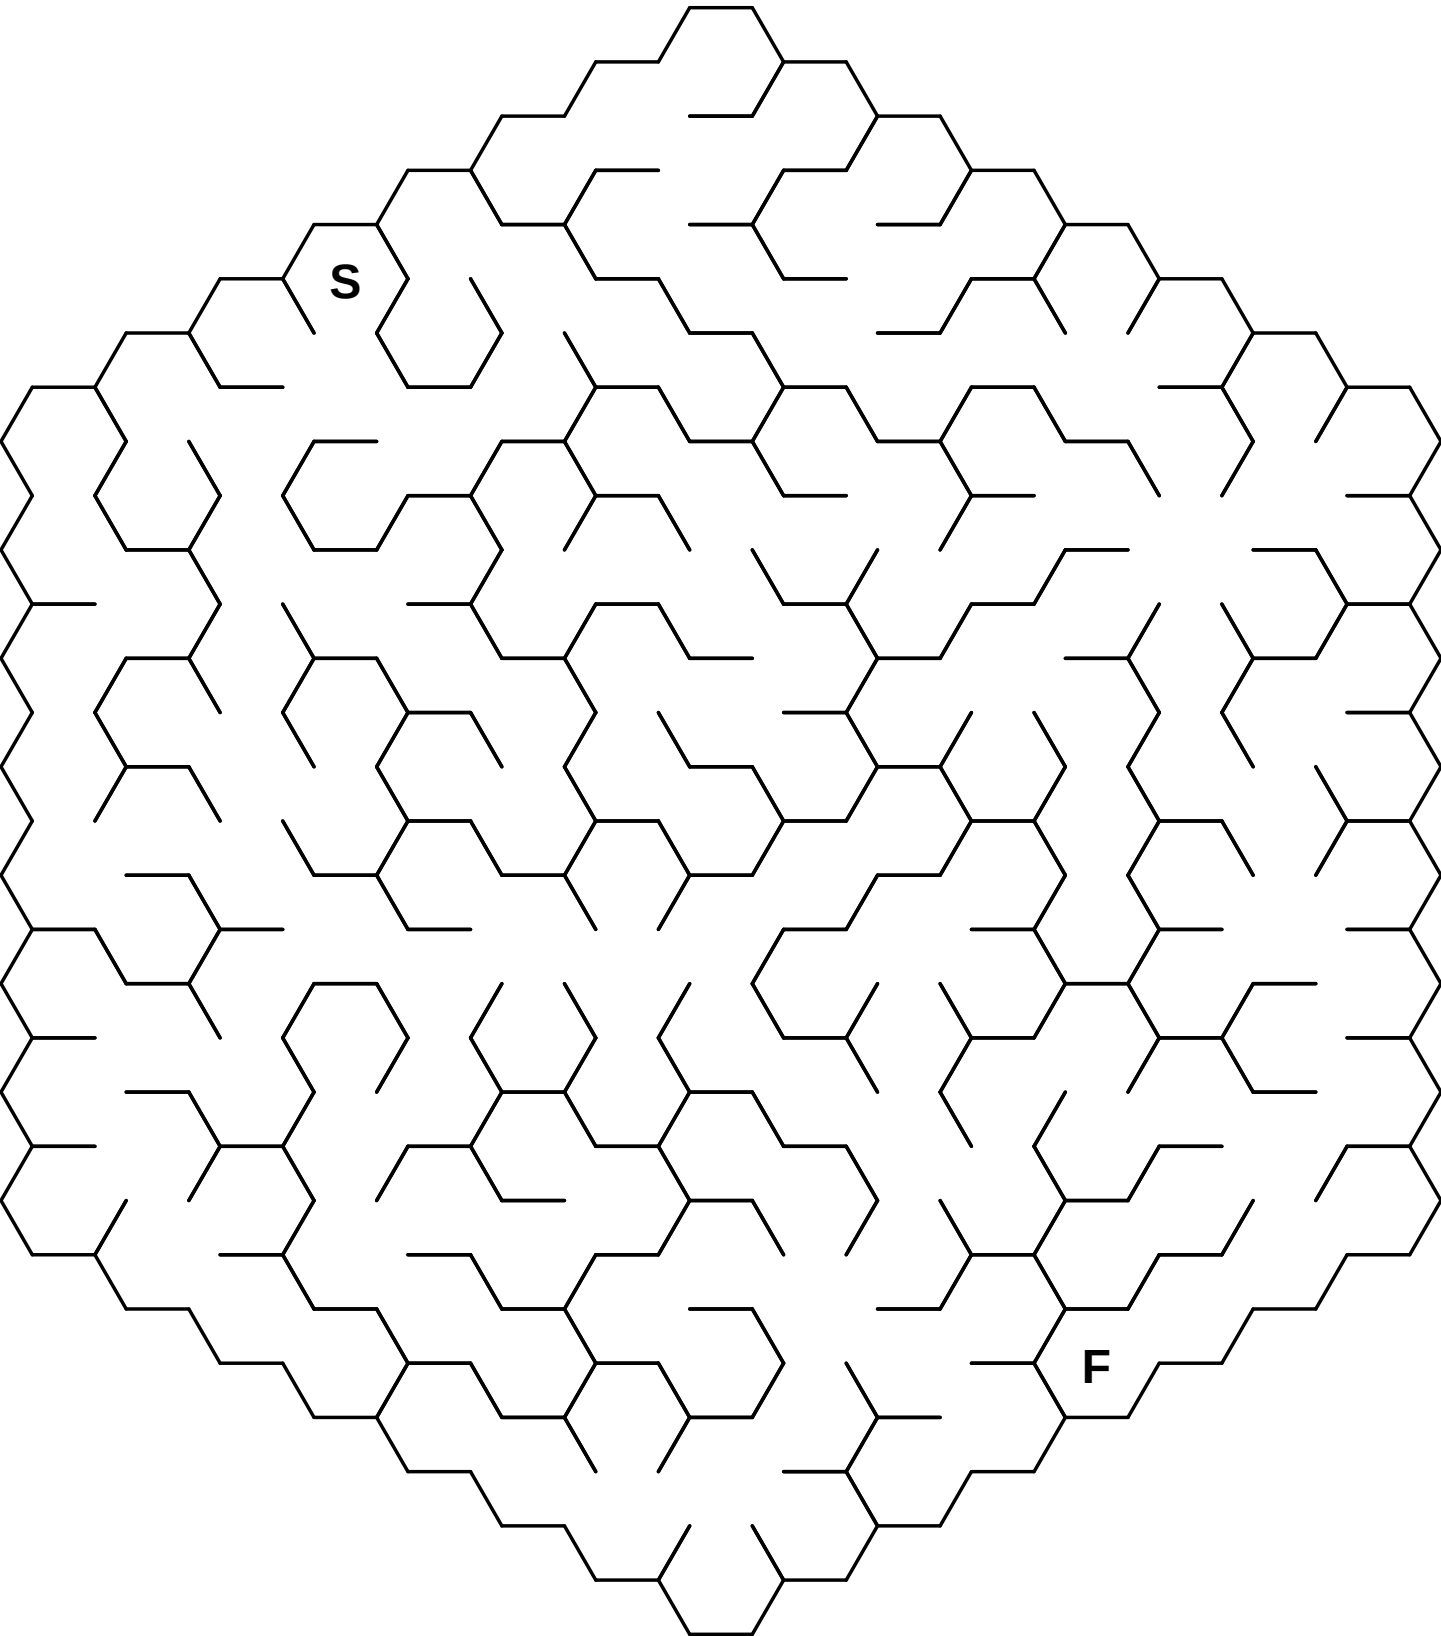

PRO TIP

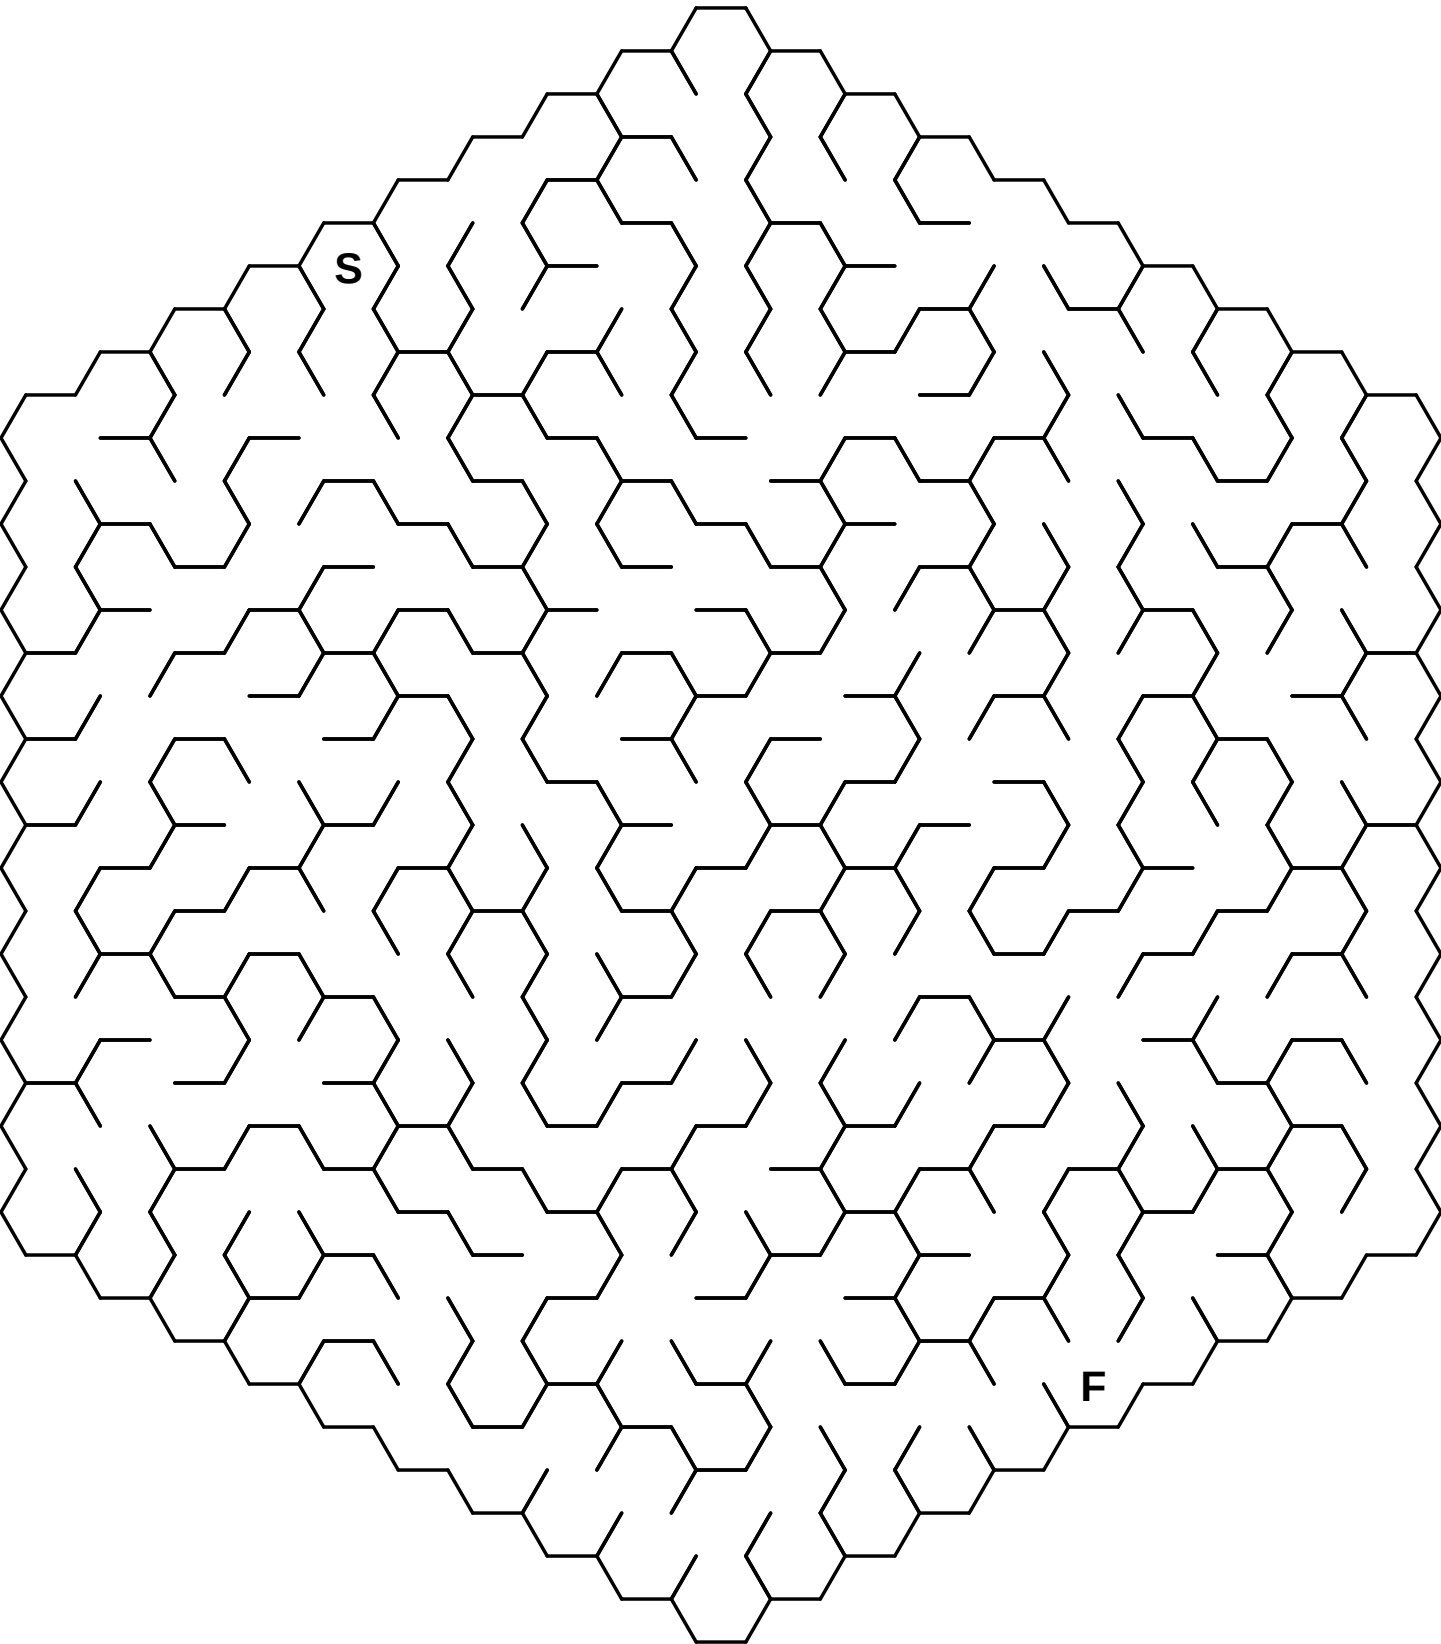

In hex mazes, dead ends are shorter than in square mazes because each cell has more connections. Scan for obvious dead-end corridors first.

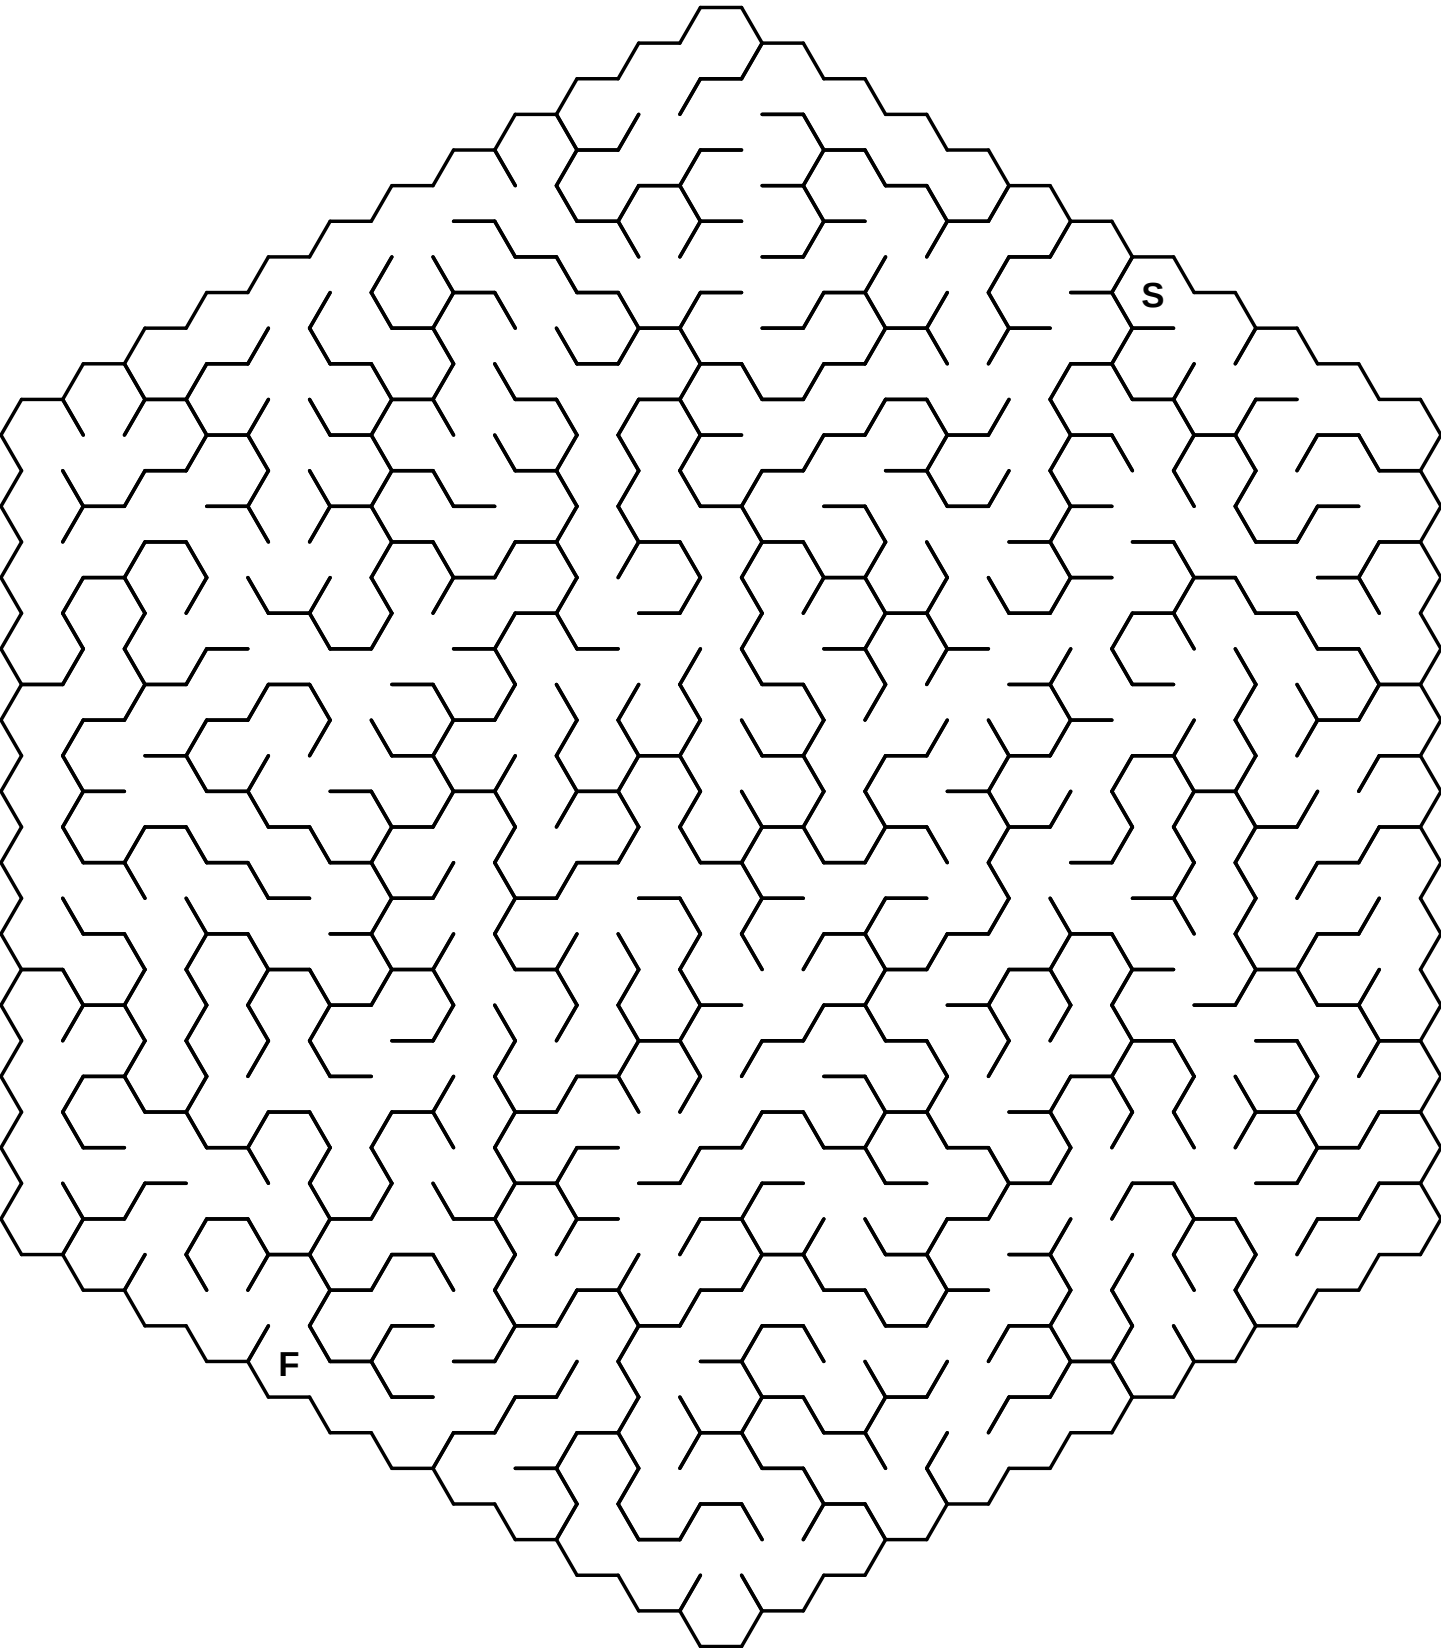

COMMON MISTAKES

- Missing a passage — hex cells have 6 walls, not 4. Check all six directions.
- Backtracking unnecessarily — mark dead ends as you find them.
