HOW TO PLAY: SUMPLETE

Delete numbers so each row and column hits its target sum.

RULES

1. The grid has numbers in every cell plus target sums on each edge.
2. Cross out (delete) numbers so the remaining ones in each row sum to the row target.
3. The remaining numbers in each column must also sum to the column target.
4. Every target must be satisfied simultaneously.

SOLUTION

x	3	3
4	x	4
4	3	

PRO TIP

If a target equals the full sum of its row or column, keep every number. If the target is 0, delete them all. These extremes narrow down the rest.

COMMON MISTAKES

- Deleting too many numbers early — check row AND column sums before committing.
- Forgetting that each row target and column target must both be satisfied simultaneously.
